PRESQUE ISLE AVENUE WORK TO BEGIN MAY 7

The Presque Isle Avenue Reconstruction Project is planned for a May 7 start. This is a continuing project from last year's construction season that, due to weather and other unforeseen delays, could not be finished last year. Remaining work consists of lawn restoration, permanent pavement markings, and various minor tasks.

It is anticipated that there will only be minor traffic disruptions. Traffic control will consist of lane shifts and flag control. There are no plans to close any of the streets in the area, and all work for this project will be completed in three weeks.

The public is reminded to pay close attention to all traffic control signage, lane divider barrels and cones, and be aware of all construction workers/equipment in the construction zone.

Hebert Construction Company is the general contractor for this project.

The City of Marquette asks you for your patience during the construction process.
