PROSPECT STREET DISRUPTIONS AND CLOSURES BEGINNING SEP. 11

Beginning at 7 a.m. on Tuesday, Sep. 11, Oberstar, Inc. will be removing partial sections of curbing, replacing water main/services, and proceeding with sanitary sewer lateral replacements on Prospect Street, from Fourth Street to Third Street. This work is the prerequisite for the milling and overlaying for this street. This work will begin with a three-day road closure and then proceed with intermediate road closures.

The public is urged to use extreme caution and follow all warning signs, lane shifts, and other traffic control measures. The work is expected to last two weeks for this phase of the project. Additional announcements will be forthcoming for mill and overlay activities.

The City of Marquette asks you for your patience during this process.
