License to Use City/Public Property Request Procedures

All License requests are reviewed by a team of staff members and then are approved or denied by the City Commission. The general process is stated below.

Until the License Agreement has been approved by the City Commission, any zoning permits related to the License area may be suspended for review by staff. Permits for work on private property that are not affected by approval or the License request may be processed, but a separate permit may be required if the property owner chooses to proceed with other work while waiting for a License request to be approved. These decisions are handled on a case by case basis and should be made in consultation with Zoning Division staff.

1) after a complete application is submitted the City Planner will circulate the application to a group of reviewers that includes the City Engineer, Treasurer, Superintendent of Public Works, City Planner-Zoning Administrator, and Fire Marshal. The Police Dept., Parks and Rec. Dept., and the Downtown Development Authority may also be asked to review the request if the location or other factors make their input relevant to the application request.

2) Staff will either recommend to either approve or deny the request, and may provide comments to support their recommendation, usually within one calendar week and within 10 business days.

3) A. If there is no significant reason to believe the application may not be approved by the City Commission after staff review, the City Planner will send the application and an Exhibit showing the approximate ground area of the License request to the City Attorney to have a contract created for the use of the License area. Proceed to item 4.

3) B. If there is reason to believe that the City Commission may deny the request after staff review, the Planner will not send the application to the City Attorney and will place the application on the next City Commission agenda that can be added to, as a New Business item for the Commission to discuss and determine if the request should be approved with a contract or denied. If it is denied there is no further action.

4) When the contract has been created, the Planner will send a copy to the applicant for their inspection, and if they find it acceptable they will be required to sign three copies that are notarized in their presence by a City staff member.

5) With copies of the agreement/contract signed by the applicant completed, the Planner will place the application on the next City Commission agenda that can be added to, in the “consent agenda” portion of the agenda for that meeting. Items on the consent agenda are voted on as a package and are not discussed, with the rare exception when the Commission votes to approve the agenda at the beginning of the meeting and makes a change to move something from “consent” to “new business” or “old business” for discussion of the item.

6) With the contract approved, the Mayor will sign the document after the meeting and the City Clerk will sign and record it the next day, then two copies of the fully-executed document will be sent to the Planner.

Once the License Agreement has been approved by the City Commission, any zoning permits related to the License area may move forward, and the Zoning staff will proceed to process such applications.

7) The Planning Office will send a completed digital copy of the License Agreement to the applicant and mail a hard copy to the applicant upon their request.
