

Recreation Marihuana Buffer Map with Zoning for Marihuana Microbusiness - Heavy Manufacturing and Marihuana Processor - Heavy Manufacturing

Heavy manufacturing means primarily moderate-and high- impact industrial uses that need to be separated from residential and other uses due to potential land use conflicts. Heavy manufacturing usually means continuous processing, as in the assembly of motor vehicles or the manufacture of chemicals, and may involve the manufacture, processing or packaging of raw or unprocessed materials that are inherently dangerous or hazardous due to flammability, radioactivity, explosiveness, or toxicity. This category shall also include any establishment or facility using large unscreened outdoor structures such as conveyor belt systems, cooling towers, cranes, storage silos, or similar equipment, that cannot be integrated into the building design, or engaging in largescale outdoor storage. Any industrial use that generates noise, odor, vibration, illumination, or particulate that may be offensive or obnoxious adjacent land uses, or requires a significant amount of on-site hazardous chemical storage shall be classified under this land use. This use shall include any packaging of the product being manufactured on-site. Examples include but are not limited to the production of the following: large-scale food and beverage operations, lumber, milling, and planing facilities; aggregate, concrete, and asphalt plants; foundries, forge shops, open air welding, and other intensive metal fabrication facilities; chemical blending, mixing, or production, and plastic processing and production.

Please note, if any of the buffer areas touch a parcel that parcel is not allowed to be used for a Marihuana Establishment.
